Supporting Irish manufacturers and Irish jobs

At Pallas Foods our mission, when sourcing products for our Customers, is to always source products of the highest quality and safety standards. While we purchase local in the first instance, it is not always possible to source our ever increasing range locally. Having stated that, we are very aware of our responsibility to Irish manufacturers and endeavour to always source Irish manufactured products and in turn support Irish jobs. The "shamrock" logo can be found throughout the Food Book and demonstrates our commitment to support Irish manufacturers and Irish jobs on the Island of Ireland, while not necessarily conveying any claim in relation to the origin or provenance of these products.

We encourage our customers to support such products and in turn we are all supporting Irish jobs.

Delicious, Award-winning food from our farm, to your local store...

We've had livestock feasting on the lush grass of County Tyrone for over 150 years - that's plenty of time to learn what it takes to rear mighty fine beef! The provenance and quality of our food is what we are all about, which is why we rear our own cattle and mature all of our beef for 28 days - to ensure it's as tasty and tender as possible.

We're not fancy chefs here at Cloughbane, just good, honest cooks preparing meals for our customers the way we do for our family.

Tips for creating a great

Cheese plate

Choosing cheeses from different categories & milk source means you will have a variety of textures & flavours.

Each Artisan cheese listed in our Food Book is classified by category & milk source. This is indicated by the following:

Cow Milk Ewe Milk Goat Milk Raw Milk

The habit of serving cheese before dessert is practised by the French for the simple reason that this enables the red wine from the main course to be finished with the cheese. The sweet wine can then be served with the blue cheese (strongest flavour, so should be last on the cheese plate) and follows through to accompany the dessert.

Colour & shape should come from the cheeses & not the accompaniments, allow the cheeses to be the hero of the plate. Allow around 55g (2 oz) of each cheese per person.

Arrange your cheeses from mildest to the strongest - see diagram below for a guide to arranging your cheese plate.

Find all the benefits of sheep and goat's milk in our organic yogurts and cheeses.

A wide range of organic dairy products from sheep and goat's milk. In our recipes, we use organic French milk only, collected in the neighbourhood of our human-size sites of production, and we have built strong partnership with local farmers for many years. Mild and creamy, sheep and goat's milk have many nutritional qualities: very easy to digest, they are a source of calcium and are particularly rich in quality protein. Bergerie offers consumers the goodness of sheep and goat's milk in its products.

Glenown Farm

Real Irish Dairy Ice Cream

Glenown Farm ice cream is made by the Murphy family in County Cork, a second-generation business founded in 1978.

This premium range of ice cream is a rich combination of fresh cream and milk blended with natural flavours and quality inclusions.

The milk and cream is sourced locally and delivered daily from cows grazing the lush pastures of the Golden Vale. Alongside the ice cream is a range of velvety smooth sorbets, equally full of flavour.

- Glenown Farm ice creams are exclusive to Pallas Foods in Ireland.
- 25 flavours of premium dairy ice cream in 5 litre Napoli tubs.
- 3 best-selling flavours in 125ml "grab and go" pots.
- Branded freezers available to rent and buy.

Ask your Pallas Foods representative for more details.

The SONNENTOR business idea is based on the concept of supporting small rural farming structures, which have a long-standing tradition in Austria. Our main concept is the ability to trace our products from the growing of our herbs to the final product we offer our customers. When SONNENTOR started out in Austria in 1988, there were three organic farmers who supplied organic herbs for the company. Today however, the Austrian SONNENTOR family has grown to over 250 farmers, who grow high quality raw materials for the organic herb and spice specialist. SONNENTOR also consistently applies its philosophy of sustainable regional development on farming projects in Austria, Germany, the Czech Republic, Romania, Albania, Nicaragua or Tanzania. Since its founding year, SONNENTOR has had a constant annual and sustainable growth with products sold in more than 50 countries worldwide. SONNENTOR products are not available in any supermarkets.

Sustainability is paramount and implemented in all areas of the business. Through research and innovation, the company has been able to switch approximately 80 % of its packaging materials to renewable raw materials. Another 12 % of packing is made of glass and 4 % is metal. Consequently, 96 % of all packaging materials are recycled or reused.
